Nikhil Bhatt

AI/ML Engineer

Delhi NCR, India (Immediate Joiner) · nikhilbhatt6980@gmail.com · +91 9310650247
GitHub · LinkedIn · Portfolio · LeetCode (270+ solved)

Summary

AI/ML Engineer with 1+ year of production experience building agentic AI systems and RAG pipelines, backed by strong full-stack engineering fundamentals. First engineer at a B2B SaaS startup, designing autonomous agents (**Google ADK**, **LangChain**/**LangGraph**) with tool-calling and human-in-the-loop approval steps, while also owning the full application stack – frontend, backend, and deployment.

Technical Skills

- **AI Agent Frameworks: Google Agent Development Kit (ADK)**, **LangChain**, **LangGraph**, Tool-Calling Interfaces, Planning Agents, Session-Based Agent Memory
- **LLM & RAG: LLM APIs** (Gemini, OpenAI, Claude), **Prompt Engineering**, **RAG Pipelines**, Chunking & Embeddings, **Vector Search (pgvector)**, Structured Extraction
- **Full-Stack Development: React 18**, **Next.js** (App Router), **TypeScript**, JavaScript, **Node.js**, Express.js
- **Backend & APIs: Python** (FastAPI, asyncio, Pydantic), **RESTful APIs**, WebSockets
- **Databases: PostgreSQL** (SQL), MongoDB, Redis, Schema Design
- **Cloud & DevOps: Google Cloud Platform (GCP)**, Cloud Run, Vercel, **Docker**, CI/CD (GitHub Actions)
- **CS Fundamentals:** Data Structures & Algorithms (270+ LeetCode problems), DBMS, OOP

Experience

LyteHire AI *Jul 2025 – Present*
Software Engineer *Delhi, India*

- Joined as the first engineer at a B2B SaaS platform and built the entire product from scratch, including its core AI agent workflows, using **Python** and the **PERN stack** (**PostgreSQL**, Express, **React**, **Node.js**).
- Built a document-automation pipeline (**LLM APIs** + **pgvector**) that parses resumes and scores candidates against job descriptions using structured extraction and vector-based retrieval.
- Designed an autonomous email agent (**Google ADK**) with **tool-calling** and a human-in-the-loop step – looping in the client's HR team via CC whenever a query needs human judgment.
- Built a real-time voice interview agent (**WebSockets**, sub-1.2s turn-taking latency) built from scratch rather than a managed platform, generating structured evaluation reports with final decisions routed to a human reviewer.
- Built the full-stack application end-to-end: **React**/**Next.js** frontend, **REST APIs**, and **PostgreSQL** schemas.
- Owned deployment and monitoring on **GCP**: **Cloud Run**, **Docker**, and **CI/CD** pipelines via GitHub Actions.
- Reviewed code from 2 interns and worked within a Git branching and pull request workflow.

CipherSquare Technologies *Jul 2024 – Sep 2024*
Backend Developer Intern *Delhi, India*

- Developed transactional **REST APIs** and containerized microservices using **Docker** and PHP Lumen.
- Built isolated containers for integration testing and resolved production edge cases using structured API logs.

Projects

NL-to-SQL Assistant – AI-Powered Database Query Tool GitHub · Live Demo

- Built and deployed a full-stack tool (**FastAPI** + **Next.js** + **PostgreSQL**) converting natural-language questions into safety-validated SQL, with **JWT**/Google OAuth, credit-based usage with automatic refunds, and **Redis**-backed rate limiting.

JobQuest – Recruitment Backend Platform GitHub

- Relational recruitment software layer designed with **Node.js**, **PostgreSQL**, and Prisma ORM utilizing strict route data verification structures and indexed database query optimization.

StayFinder – Full-Stack Property Booking Application GitHub

- Built a full-stack booking web application using **Next.js**, **Node.js**, and MongoDB with dynamic listing workflows, schema validation, and **JWT** authentication.

Education

Master of Computer Applications (MCA) – IGNOU *2025 – 2027*
Bachelor of Computer Applications (BCA) – Maharaja Surajmal Institute (GPA: 9.3) *2022 – 2025*
